

Comment RedHat va booster encore plus la collaboration à l'avenir ?

RedHat Inc. est le leader mondial des solutions informatiques Open Source.

Collaboration

En 2015, think2make a géré un workshop pour amplifier la collaboration et la productivité au sein des équipes RedHat.

« Sedat from Think2Make helped us to think differently about collaboration and productivity challenges.

By following the think2make process and with Sedat's good moderation we got into the right mindset to think about new ideas to overcome the challenges.

Several ideas will be implemented based on this workshop.

Sedat has a good style to push you smoothly into this zone, so that we got the whole broad mixed team interested and actively participating »

Marco Bill-Peter
